SuperLeague – Corporate Design

This short document describes the visual design choices for my SuperLeague website made for Assignment 4. It includes the logo, color choices, basic structure, and how the design will be used in the next steps of the project.

Brand and Goal

The idea was to make a simple and consistent look. The main color is a dark purple, taken from the logo. The layout is dark-themed, clean and easy to read. I used only plain HTML and CSS.

Colors

Brand color: #2B275F (from the logo)
Background: #0C1116
Card: #111827
Text: white or light gray (#E5E7EB)
Muted text: #9CA3AF

Typography

I used standard system sans-serif fonts (Segoe UI, Roboto, Arial). Headings are bold, normal text is regular. No extra fonts are used.

Logo

The logo is a simple wordmark saying "SuperLeague" in white on a purple background. It appears at the top left of every page and defines the color scheme for the website.

Page Structure

The website has two pages:
- index.html (homepage with short introduction)
- imprint.html (legal notice with contact and disclaimer)
Both share the same style.css file and logo image
